

## Expanding Into Your Divine Nature

Everything on this planet derives itself from Nature. Humans have an added component: Creativity. With Creativity, we can communicate and change Nature. This is our Divine inheritance. Though this gift of change can be misused, we find humanity moving forward, reclaiming beauty and peace, as our birthright. Within your DNA, the codes exist to make this happen. Each of us has the capacity to expand into his or her Divine Nature.

The following ten elements or laws, if you will, serve as guidelines for you to consider as you expand into the higher realms of your Divine Nature:

1. Not lying to Self.
2. Being accurate and honest to others.
3. Constantly communicating with Spirit/God/Infinite being.
4. Consciously Living in the Moment
5. Being Spontaneous.
6. Embracing Spirit and giving gratitude.
7. Being "detached" and expressing "Unconditional Love" 24/7.
8. Seeing "Beauty and Good" in all things.
9. Creating Beauty in all your intents, thoughts, and actions.
10. Feeling amazed and enchanted about Life and the Love for Life.

Put these elements into action and you will change your "Inner" and "Outer" environments.

Love to Life, Love to All.
